Could you try and reproduce on SHOW so that we can see what exact parameters are causing the plugin to crash

Hi Pascal:

I can't reproduce on show.t.o.

There must be something customized in i18n.t.o, but I have no clue what it is.

I tried to go to "admin > editing & plugins" to disable fancy table but I couldn't, same error:

```
Fatal error: Class 'Table_Plugin' not found in
/www/htdocs/w00ec2fb/lib/wiki-plugins/wikiplugin_fancytable.php on
line 11
```

thanks for trying to reproduce

I'll see if we can get a DB Dump of I8N to investigate
