Description
We need to decide about DefaultSettingsChanges in 1.10

Some of the new features are much better than previous ones (ex new diff engine). People upgrading their Tiki could conserve their setting. However, new installs should take advantage of the new features.

A note should be added in tiki-install.php This must be low maintenance for Tiki dev team.

It's minor , no ?
Could you be more precise/exhaustive in what features you mean ?
