Description

BigBlueButton fails to load and exits at this url:

/tiki-ajax_services.php?controller=bigbluebutton&action=join

I have traced it to the following function in /lib/core/Services/Broker.php:

```
private function attemptProcess($controller, $action, $request)
{
    if $controller class="wiki wikinew text-danger tips isset">$this->controllerMap$controller {
        $controllerClass = $this->controllerMap$controller;
        $handler = new $controllerClass;
        $method = 'action_' . $action;

        if (method_exists($handler, $method)) {

            if (method_exists($handler, 'setUp')) {
                $handler->setUp();
            }
            return $handler->$method($request);
        }
    }
}
```

```
} else {  
throw new Services_Exception(tr('Action not found (%0 in %1)', $action, $controller), 404);  
}  
} else {  
throw new Services_Exception(tr('Controller not found (%0)', $controller), 404);  
}  
}
```

the code stops functioning at this line of code:

```
return $handler->$method($request);
```

When I tried to reproduce the problem there was none. I reinstalled tiki 11.0 and now this feature works.
