Description
    Add a feature to move files in between the file system and the database

    This feature:
    tiki-admin.php?page=trackers
    tiki-admin.php?page=fgal
    tiki-admin.php?page=wikiatt

    should be added here:
    tiki-admin.php?page=gal

    (In fact, it should be backported from 1.10) "Move images from filesystem storage to database storage"

Solution
    Done for all features...

Access from here: tiki-admin.php?page=gal

I just used for 877 images!

is there a way to go the other direction?

Can i move a db based file gallery to a filesystem based one?

Marc Laporte 03 May 08 12:55 GMT-0000

Yes, I am pretty sure.

In 1.9.11, there is the option to "Move images from database storage to filesystem storage" in the mover

at tiki-admin.php?page=gal

In 2.2, I only see the option to "Move images from filesystem storage to database storage"

What about 3.0?
