Description

Mobile mode in doc.t.o (12.x)
Log in as registered user, with chrome on android
Go down and click to open the editor menu
Click on File galleries.
Error shown:

Page not found
Documentation&ui-page=csmenu5-6

I tried the same from a PC with Chrome 29, switched to mobile mode, and then, when I cicked at the File Galleries link, or Adminlink, I get a WSOD with the url:
<https://doc.tiki.org/Mobile+Home&ui-page=csmenu5-6>
(for file galleries, in this case)

UPDATE: same type of approach seems to work in dev.t.o. Weird!

UPDATE 2015: Is this still relevant? We're not on 12 any more so i think this needs a show instance to be investigated further

Looks to me like it's worse than that even - most of the menus seem to fail for me (in a normal browser, but in `mobile_mode`)
Investigating further...

Jonny Bradley 30 Oct 13 18:38 GMT-0000

Well, after a *long* time in the debugger and DOM inspector, with only the "blog" menu option really working (mostly) i finally cleared all caches, they now all work fine (locally) - as does <https://nextdoc.tiki.org> Editor Menu. Can you retest?
Maybe it's a particular browser issue - i'm mostly checking in a normal browser... will have a look with my (fruit-based) phone 😊

Jonny Bradley 30 Oct 13 18:44 GMT-0000

nextdoc is fine on iOS7 Safari

Xavier de Pedro 22 Nov 13 14:18 GMT-0000

Weird. The link to file galleries through the mobile mode and "Editor menu" produces weird results.
<http://doc.tiki.org/tiki-index.php?page=Mobile+Home#main&ui-page=cssmenu5-6>

However, same procedure to click on file galleries from the main app menu in mobile mode in dev.t.o works nicely.
