Description

I creatd a new wish:

<http://dev.tiki.org/item4797>

And I clicked to created show.t.o instance (trunk, becuae 12.x is not available). And the spinner quickly stops (10 seconds?), with no results (no changes to the page, no link to show.t.o instance, etc)

Comments

Olaf-Michael Stefanov 12 Oct 13 16:46 GMT-0000

In connection with bug/regression report 4801 tried to create a show.t.o instance, only to find that:

(a) there is no option to create a 12.x instance,

(b) noting Xavi's posting no sense trying with trunk, besides which 12.x has branched from trunk, meaning that even if a trunk instance could be created, it would be meaningless for proving a regression in 12.0svn. For bug 4801, it is documented on demo.t.o (and screen shots are included from there).
