trackerfilter plugin /d option not working with an Item Link field | Tiki Wiki CMS Groupware :: Development
trackerfilter plugin /d option not working with an Item Link field

Status
        Pending

Subject
        trackerfilter plugin /d option not working with an Item Link field

Version
        11.x Regression
        12.x

Category
        • Regression

Feature
        Wiki Plugin (extends basic syntax)

Resolution status
        Partially solved

Description
        The trackerfilter plugin has a 'filters' parameter with a /d option that allows a value to be selected
        from a drop down list so that all records with that value in the field are filtered out for presentation
        e.g a typical plugin might look like

        {trackerfilter filters="238/d" action="Create share holding report" noflipflop="y" trackerId="23"
        fields="238:244:240:241:242" compute="240/sum:242/sum" sort="y"}

        But if field 238, as used in the example above, is an Item Link field the trackerfilter process does not
        find any records

        This is a regression in both 11.x and 12.x but did work previously.

        Other field types seem OK (although not tested them all !!!!)

Solution
        I had fixed this issue in 12x.

        Please check this commit id: 48269

        Only partially fixed - when the /d filter field is an Item Link then the drop down options for the item
        link values are now found/displayed correctly so can be selected BUT the subsequent filter process
        does not find the records that match item link value

        I have a worked example of this in my own test site that can be accessed by other devs - just email

me for the details

Could you reproduce on Show please. There is a new Show feature coming up with will allow us to easily upgrade the SHOW instance and test if something has been fixed or not. There is significant value is demonstrating a bug on show especially something like this. that way many people call collaborate in trying to fix, confirm and test the bug.

As it stands, I will not reconfigure a tiki just to confirm this bug therefore I'm not going to tackle it personally.

thanks

Pascal St-Jean 24 Nov 13 00:10 GMT-0000

Hi Geoff,

this bug seems to need the attention of a more senior developer. could you please coordinate to continue to try and resolve this issue.

thank you
