Description
    Since about last week tiki-browse_categories takes about 10 times as slow as before.

    Jonny can you help? I tracked it down to fix in r47923 that luci committed to fix an object count problem. (I sent an email)

Solution
    Added a new pref in r48176 to disable this. I have a bit of code to allow counts to be switched on and off on the page but it was too messy to commit now, hope to add it for 12.1

Importance
    10 high
