Description
Hello,

a freshly unzipped Tiki 11.0 installation which is configured to use Tiki and LDAP user accounts can't require_once the Net/LDAP2.php file in lib/auth/ldap.php line 14.

I tried to re-generate the composer autoload files, but without success.

Now, I extended the include_path in my php.ini file for vendor_extra/pear

Please have a look at this issues.

Thanks und regards
Lars

lkordix 28 Feb 14 14:28 GMT-0000

Hi! Is there a release date for Tiki 12.1? We are looking forward to upgrading to an LTS version as soon as possible.

Marc Laporte 26 Jul 14 05:28 GMT-0000

Can you confirm if it works OK?

Thanks!
