Description

I went to <http://demo.tiki.org/12x/tiki-install.php> to proceed to a test of the installer (for an upgrade, not fresh install) and I saw: "Database `d01863d1` was created" which doesn't make sense with *Tiki found an existing database connection in your local.php file. Database name: "d01863d1"*

Tiki installer

12.0 svn

Installation

1. Welcome
2. Read the License
3. Review the System Requirements
4. Reset the Database Connection
5. Install/Upgrade
6. Review the Installation
7. Configure the General Settings
8. Enter Your Tiki

Tiki requires an active database connection. You must create the database and user *before* c

Tiki found an existing database connection in your local.php file.
Database name: "d01863d1"

[Use Existing Connection](#)

or

[Modify database connection](#)

Database 'd01863d1' was created.

Solution

Unwanted message 'Database `DB_name` was created' are removed from Installer.

Please check this commit id: r48252

Hopefully fixed in r48286 so error is not created and database is created if possible, r48252 maybe need rolling back to be able to see it in trunk

@Jonny: latest 12.x looks good and r48252 should be rolled back.
