Solution

This should work in Tiki 1.9.4 Please test & report (I don't have a CAS server to test). I added in the docs that you must install phpcas separately.

Comments

atd 08 Jun 07 11:19 GMT-0000

I've just installed tikiwiki daily snapshot and it's not working.
After validating with CAS server, tikiwiki returns "Invalid username or password" error.

atd 08 Jun 07 11:27 GMT-0000

It doesn't work either if the user is already registered with the same username and password, of it you allow tikiwiki to register a new user.

ajan 04 Nov 07 19:31 GMT-0000

In lib/userslib.php find the function validate_user. In the beginning of this function there is a check that the password sent is not empty. This does not work with CAS authentication since there is NO Password sent.

Just comment out that part or change it with something like this:

```
if ((( $prefs'auth_method' != 'cas') || $user=='admin') &&
'min_pass_length'" class="wiki wikinew text-danger tips strlen">$pass) < $prefs'min_pass_length'
{
return false;
}
```

Bernard Sfez / Tiki Specialist 05 Oct 21 08:41 GMT-0000

I have no way to reproduce this, please re-test and post updated details.
