Related-to

• ● Review and modernize support for monitoring systems like Zabbix NetData, Nagios, etc.

Description

1) Document the state of testing going on tiki.org sites, collect historical information, and produce monthly report on pass/fail on various checks. (some of these checks might fail a lot of the time with no problem, but collecting the historical info is useful to tune the tests for future, notification can be disabled for most of these checks).

2) If possible, provide easy access to the monitoring dashboard for tiki.org sites.
