Related-to

- Wiki page history: Data loss in some cases of rollbacks

Description

last version of a wiki page in dev.t.o doesn't show the real changes I've just made, but something else!

reproduced here:

- http://dev.tiki.org/tiki-pagehistory.php?page=Keywords&history_offset=1&diff_style=sidediff&diff_style=sidediff&show_all_versions=y&compare=Compare&newver=0&oldver=204&tra_lang=sq&paginate=on&history_pagesize=60

I've just added a new keyword for

□□□□□□

((Syntax Highlighter)) (codemirror)

and my changes are not shown, plus a diff in wiki history shows a different edit as mine

UI weirdness indeed, but always been like that...

Marc Laporte 27 Nov 13 23:01 GMT-0000

Maybe page renames could be part of history?
