Description

2 broken images on "Small Organization Web Presence". There should be no visible issues on featured profiles. If a feature is buggy, it shouldn't be in the profile.

Solution

You need to run `sh htaccess.sh` to get icons from `/pics/icons/...` path.

I had fixed the slider issue. Please check this commit id: 48347.

@Mani: thanks for slider fix. Running `sh htaccess.sh` can't be a requirement for featured profiles to work

@**Pascal**: The Profiles Team has to weigh in here: URLs on [profiles.tiki.org](http://profiles.tiki.org)

Image Directory Revamp did a nice clean-up of image paths. All profiles after this need to be updated to use new image paths. If a page is shared between old and new profiles, a creative solutions needs to be found. Ex.: fork the profile page, or remove image or put an image which works for both old and new. Thanks!

Removed the images from the shared profile page. They didn't bring any value and caused issues.
