Description

Because if you are good in English, it's not immediately obvious what is translated vs needs to be translated.

Any untranslated string should be seen in a fraction of a second

This is a feature request for trunk

Edit:

To activate the interactive translation : Admin -> i18n -> enable Multilingual, enable Use database for translation.

In the admin menu: Edit Language -> Toggle interactive translation ON.

Go to a page, at the top of the display you'll have a switch to turn to start translation.
