Solution

Mani, can you check if the feature: Exclude all plugins which is default on in the new tiki 12 prevent maketoc from appearing in search results?

Please report on your finding, and also, check if upgrading from Tiki 11, if pref is set to the new default or now.

I failed to reproduce on the Tiki 15 show instance, whether or not "Exclude all plugins" is enabled:

Please clearly describe the issue if it persists and indicate a precise version affected.
