Comments

Pascal St-Jean 05 Nov 13 02:18 GMT-0000

many things might be causing this no? Do we have any idea or something that was done before the bug was noticed? Any lead that DEV can go by?

Jonny Bradley 05 Nov 13 11:04 GMT-0000

I think it was connected with the change from using the user name for the filename (bad) to a guid, sometime in 11.x i think. This was because some languages (Hebrew for instance) uses non-ascii chars which most filesystems can't handle.

No migration was provided afaik... (or not enough maybe)

Jonny Bradley 05 Nov 13 11:05 GMT-0000

I had to upload mine both here and on tiki.org - shouldn't they get copied over via intertiki somehow?

Jonny Bradley 08 Jan 14 13:25 GMT-0000

I replaced mine about a month ago (12 beta) and today it was gone again. Replaced on tiki.org once more now...

Nelson Ko 14 Nov 13 20:36 GMT-0000

Not sure if it is correct to add some kind of migration script in the installer, or to provide a manual script in doctools or what? Jonny, any opinions?

Marc Laporte 22 Feb 14 15:19 GMT-0000

Thanks!

Jonny Bradley 10 Apr 14 17:39 GMT-0000

Mine went again, i did do a small fix recently r50587 to make avatars work in newsletters and fixed a possible issue where avatars came out with a .jpeg extension and then weren't found in `get_public_avatar_path`, but that didn't make them come back...

I'll add mine again here but i think to investigate further we would need file access to the servers (and more of an understanding of how intertiki works than i have)

Jonny Bradley 10 Apr 14 17:41 GMT-0000

Looks like tiki.org now uses gravatar - so not sure what that means for intertiki...

Marc Laporte 14 Apr 14 03:36 GMT-0000

Thanks!

luciash d' being 13 Jan 15 18:37 GMT-0000

I keep loosing my avatar on <https://tiki.org/user199>
