Description

Page alias worked in doc.t.o in 9.x at least.

I tried with:

<http://nextdoc.tiki.org/Dynamic+items+lists>

<http://doc.tiki.org/Dynamic+items+lists>

and none of them both work. However they both are alias names from this pages:

<http://nextdoc.tiki.org/Dynamic+items+list>

<http://doc.tiki.org/Dynamic+items+list>

as you can see at the bottom of the page.
