Not sure what is nl1. Could you describe what is needed so that I can assign to Mani to fix.

thanks

nl1 is (was, afaic) the short SEF link to newsletter1 written in a former .htaccess (pre- route.php)

I don't see nl1 when route.php was introduced:

<http://sourceforge.net/p/tikiwiki/code/44661>

I don't see it earlier either:

http://sourceforge.net/p/tikiwiki/code/15000/tree/trunk/_htaccess

http://sourceforge.net/p/tikiwiki/code/25000/tree/trunk/_htaccess

But we can easily add 😊

I think this must have been a custom thing, no?

I did do several fixes to newsletters the other day to make newsletter42 etc work better, that was partially broken.
