Description

Followed the steps described in : <https://doc.tiki.org/PluginTrackerCalendar>

However, the events (tracker items) do not get displayed on the Calendar, which is displayed by calling the TrackerCalendar plugin on a wiki page.

Tried the same thing on demo.tiki.org/tiki12 but got the same result.

Solution

Works by default in show.t.o

Please, revise that the search index can be rebuilt in your site. That's very likely the source of the problem in demo.

show.t.o instance, login details:
