### Description

I have tested 'Dynamic Item List' tracker field at version 12.0 alpha for upgrading from version 10. According from my simple test, it does not work.

Thanks,  
Joon

### Solution

I've reproduced your example in a profile ( [http://profiles.tiki.org/Dynamic\\_items\\_list](http://profiles.tiki.org/Dynamic_items_list) ) , and it works, as well as in your show.t.o instance, so that I'm closing this bug report.

After you select a value in teh first drop down of the service tracker, just wait some time until the second drop down gets populated with the right values.

Please, re-test, and if you still get some error, re-open the bug and report back with the new information, etc. Thanks for your help.

Um...

I have made Tiki instance for testing this bug, and tested it.

[http://joonhyun-11611-4896.show.tikiwiki.org/tiki-list\\_trackers.php](http://joonhyun-11611-4896.show.tikiwiki.org/tiki-list_trackers.php)

Unfortunately, Dynamic Items List tracker field feature is working well.^^

Where is my mistake? Exactly it does not work for my test system.

Park JoonHyun 08 Nov 13 17:25 GMT-0000

I think this issue had been checked and fixed already by developer. Because this demonstration system is based on REV 48366 of version 12.x. And my test system which tested the feature is 12.0 alpha. based.

So I believe that there is different version, and it was been fixed already.

If it is right it, I would wanna close this issue.
