```

Solution

All very odd - i think we should switch this field over to use the currently supported 'STARS' type of rating, however, try r48409 & r48410 which sort of fixes this, i think. What did it do before?

@Jonny: looks good now

This field seems to use the 's' or 'system' type of ratings field, which in the fields list is marked as deprecated, although not in the title. It is also marked as experimental in the code.

Somehow the "options" param has been cleared out, so i think that's why you only get one radio button, but i can't see how the stars on the view mode are beings made. The tpl's seem to use different lists - input uses options_array (not working) and output uses rating_options (working).

All quite mysterious... will try again another time but it might be an idea to switch the field type to normal STARS ratings?
