Description

Tiki admin should not hit error / issue because of this

"Warning: Version 2 of the Google Maps JavaScript API is no longer available for new applications and will be turned down for existing applications on November 19, 2013. Please follow the guide to migrate your code to version 3 of the Google Maps JavaScript API. As of November 19, 2013, all applications requesting v2 will be served a special, wrapped version of the v3 API instead. We expect this wrapped version of the API will work for most simple maps, but we strongly encourage you to migrate to the v3 API immediately."

Here is an example:

It's no longer possible to get v2 keys so this should be addressed

Hey Marc, don't think this is a good task for Mani. This should be tackled by whomever has been maintaining the GMap feature
