Description

After activating the Article and RSS features I tried to generate articles from an RSS feed and it didn't work.

When clicking here http://regis-10191-4930.show.tikiwiki.org/tiki-view_articles.php nothing appears.

Workaround

Info was provided in comments to this item already.

Anyway, some infos and links were added to articles and external feeds admin panels, so taht novice admins can understand how to set up the feature, according to current codebase.

Committed in r52381 (13.x) and backported in r52382 (12.x).

Nelson, I figured this would be a good bug for you since we need the Generator for one of our features. You are probably already in this code as we speak.

thanks

Marc Laporte 04 Jan 14 02:54 GMT-0000

Pascal clicked refresh and some articles were added.

Better docs and/or a code modification to start with 10 or 20 last articles would be better
