

I had fixed this issue.

Please check this commit id:48820

Also backported to 9.x

9.x -> r48823

@Mani: <https://profiles.tiki.org/Admin> is still crashing

sorry I forget to inform.

This is the description given below in sort option,

"Sort ascending or descending on any field in the tiki_pages table. Syntax is field name followed by _asc or _desc. Example: lastModif_desc or pageName_asc".

So we can not use PageNameID as sort field. instead we can use pageName or page_id to sort.

After changing this it will work.

@Mani: Can we have a more graceful error message?

Hi Marc,

I had checked this error message. After 9.x+ branch, showing the proper error message like

But when I tried to upgrade 8.x to 9.x, still shows an old error message like <https://profiles.tiki.org/Admin>. But 9.x+ version has proper message. where I need to fix this error, I mean 8.x or 9.x. I think it's maybe a prefs. Because when I use 9.x DB, it's showing proper MSG. But upgraded 8.x to 9.x has old message. Please suggest to proceed.
