Description
    Using the switch-theme module has no effect. The page refreshes but the theme doesn't change.
    But, it works as expected when the user is logged in.

Solution
    If Silent session prefs is on, Registered Users only have a session if they log in. So anonymous users
    will lose the capacity to have things like Switch Language.

    Use this link to find the prefs "/tiki-
    admin.php?page=performance&cookietab=8&highlight=session_silent"

    Thanks jonny.
