Description

Long and extra long wiki pages are not correctly displayed by the IE. Also no scroll bars are shown, so the content vanishes completly on a certain point of the page.

Also articles are affected. 😞

Solution

It's the matter of currently used xhtml tableless layout + CSS and crappy rendering behaviour of IE. Rewrite of the xhtml + CSS is on the way...

simple.css fixed using *lite (lite/lite.css)

(don't forget to update the templates too)
