Related-to

  • Dynamic item list select gadget is too narrow

Description
    ~~Tracker inline editing: 2nd field in Dynamic items list cannot be edited (empty dropdown)~~
    Update :

  • This has been either fixed partially, or it was not properly reported.
  • In either case, the real issue as of r48534, is that when Jquery chosen is enabled, the second field in a dynamic items list (the 2nd drop down) doesn't get the appropriate width to display the labels longer than just one or two characters. The labels seems to be there, and the right options seem to be chosable. The problem is that they are not displayed in full with, and user cannot read the options.

    Reproduced in the associated show.t.o instance:
    u: admin
    p: 12345

    http://xavi-9794-4942.show.tikiwiki.org/tiki-view_tracker.php?trackerId=2

    Log in as admin, and click on the Product Version "10.2.0.5" on the row for "ERP | Oracle Database"

The dropdown just shows 10., instead of the full label 10.2.0.5.
The same happens without tracker inline editing, i.e., editing the item, such as:
xavi-9794-4942.show.tikiwiki.org/tiki-view_tracker_item.php?itemId=6&show=mod

Solution

Adding a min-width to the chosen properties, avoids the issue, since then the user can see the labels, and choose the desired option, etc.

⬚⬚⬚⬚⬚⬚⬚

.chosen-container .chosen-drop, .chosen-container-single .chosen-single { min-width: 100px; }

Commited in r48949.

Feel free to improve.

Please point to an example on one of the community sites or on show. The more data we have the easier we can help.

We have lots of bugs to solve, need to try and make it easy for developers.

thank you

Xavier de Pedro 20 Nov 13 12:19 GMT-0000

Reproduced in the associated show.t.o instance:
u: admin
p: 12345

http://xavi-9794-4942.show.tikiwiki.org/tiki-view_tracker.php?trackerId=2

Log in as admin, and click on the Product Version "10.2.0.5" on the row for "ERP | Oracle Database"

Nothing is shown in the dropdown (10.2.0.5 dissappears, and nothing else is shown in the dropdown).
