Description
We already are able to show articles, wiki page changes, etc on our calendar. So, how about showing RSS feeds on tiki-calendar.php? That would be a nice way to aggregate all the RSS feeds 😊

RSS feeds could be filtered much the same way as Group Calendars and Tools Calendars. A third column would be added with all available RSS feeds. Users could select via checkbox which RSS feeds they want. (By default none are selected)

Therefore, thanks to RSS in & out for calendars, several Tiki sites could federate calendar data via RSS.

Later, we can add ical and hcalendar (http://www.microformats.org/wiki/hcalendar). But in the mean time, it's an easy & efficient solution for calendar sharing 😊

WebCalendar has a Remote Calendars feature to support hCalendar (for example)

iCal in and out would be great.

Bernard Sfez / Tiki Specialist 05 Oct 21 09:01 GMT-0000
I read and re-read the ticket and as it mix several request and functions (ical) it is hard to evaluate only a section of the ticket. Please retest and update (Tiki23+) and eventually split the ticket so each part still requiring improvement can be worked on.
