Hi marclaporte,

I had checked this issue. But "EBrant" saved his country's name as "England".  
But it's not possible. Because we only use dropdown to select country name and based on the selection, flags are displayed. I don't know whether there is a way to save his country name from textbox.

Not sure how he could have saved other than a drop down. Does anyone else know of this would be possible?

If the flags would be broken then it would be broken for everybody
