Description

Colorbox in mobile 12.x LTS doesn't show up properly (empty black screen with a encircled cross in the middle)

To reproduce, see show.t.o instance:

u: admin

p: 12345

Load the homepage, switch to mobile, and click at the link in the homepage: "wiki syntax"

Solution

I had fixed this issue.

Please check this commit id: 49361.

r49361 stopped all the rel attributes from working in mobile mode, not just "box" - maybe not a big problem but r49362 should fix this issue while keeping wiki "rels" intact, hope that's ok
