There is a condition built into the query to exclude the current document. I cannot quite see why it does not apply on dev.t.o.

I double checked with the unit test and it's all good.

I also manually verified the built query to make sure it was not mangled by the optimizer. All is clean as far as I can tell.

Both on 0.90.5. Can't find a difference.

Perhaps upgrade the servers to 0.90.7?

Pascal St-Jean 29 Nov 13 18:01 GMT-0000

We are having the exact same issue on Tutela where the current item shows at the top. We will update once we upgrade ElasticSearch
