Description

PluginR is a mods, and mods should be shut down.

Now that licensing issues have been resolved, please move to the main code base.

“

Now that licensing issues have been resolved, please move to the main code base.

Licensing issues have NOT been resolved yet, some code needs to be rewritten... (let's avoid adding noise in this topic). And some help will be welcome in this area, from anyone who has enough skills to easily rewrite the original remaining lines of code... (not me, yet)

Xavier de Pedro 01 Dec 13 10:22 GMT-0000

I've documented in r48864 (`mods/wiki-plugins/r/lib/wiki-plugins/wikiplugin_rr.php`) with "`// NEED REWRITING`" which lines may need rewriting, since they are the same (or too identical) as the source mediawiki extension that I took as a reference.

Xavier de Pedro 01 Dec 13 10:18 GMT-0000

And what will we do if we want to contribute the integration of an external GPL'd feature to Tiki?

I mean, let's take the case of that PHPFreeChat, that someone coded to have integrated in Tiki a while ago. Or imagine that someone does a Plugin/Module for EtherpadLite, with a non-compatible-LGPL license, and wants to contribute back to the Community so that it's easy for others to install it.

What is the roadmap for the replacement of Mods? (any clear path?)

Marc Laporte 01 Dec 13 15:05 GMT-0000

It depends on what is needed.

Can be profiles, can be manual instructions.

Thanks!

gezza 29 May 15 21:07 GMT-0000

browsing through open Tiki14 issues.. what is to be done here? is it still the case that it needs rewriting? can it be an addon?
