### Description

At [http://tv.tiki.org/tiki-list\\_kaltura\\_entries.php](http://tv.tiki.org/tiki-list_kaltura_entries.php) i can see list of media.

Click on the thumbnail reveal the action menu.

This is "too" or not enough intuitive.

Instinctively clicking on the thumbnail should start the video (like view).

We should reintroduce the wrench near the info icon.

---

If i go to:

[http://tv.tiki.org/tiki-list\\_kaltura\\_entries.php?list=media&view=browse](http://tv.tiki.org/tiki-list_kaltura_entries.php?list=media&view=browse)

Clicking on the thumbnail does absolutely nothing.

So from view=browse i can't do anything but see thumbnails.

### Solution

Hi Bsfez,

I had fixed the first UI issue. Please check this commit id: 49486.

By clicking on the video thumbnail, it's switching the videos. It's working fine in my local. But in <http://tv.tiki.org> site, I noticed that the videos are not playing when comes directly using browse media link [http://tv.tiki.org/tiki-list\\_kaltura\\_entries.php?list=media&view=browse](http://tv.tiki.org/tiki-list_kaltura_entries.php?list=media&view=browse) (without Media\_id) not working.

{kaltura id="1\_b2d6e4gr"} (sorry, this was killing this page )

Thanks!

[https://tv.tiki.org/tiki-list\\_kaltura\\_entries.php?list=media&view=browse](https://tv.tiki.org/tiki-list_kaltura_entries.php?list=media&view=browse) works fine for me (click thumbnail and the video appears).

tv.t.o is very out of date anyway, should be tested on 14 or 15 imho

😄it is not relevant, I updated this item to test <https://dev.tiki.org/item5896>.
