Description
Uploaded three files as user "xavi" (simple registered user) to tv.t.o, and changed the title, added description and tags to only the first of the three while uploading them (my mistake, it seems, due to being confused with the interface).

Then, in order to change details of the other two, I loged in as user "xavidp" (with admin rights) to "change details". When I clicked at "Save" to have the new details saved, the page changed to a White Screen of Death (WSOD), and browsing again to the media showed that the details were not saved.
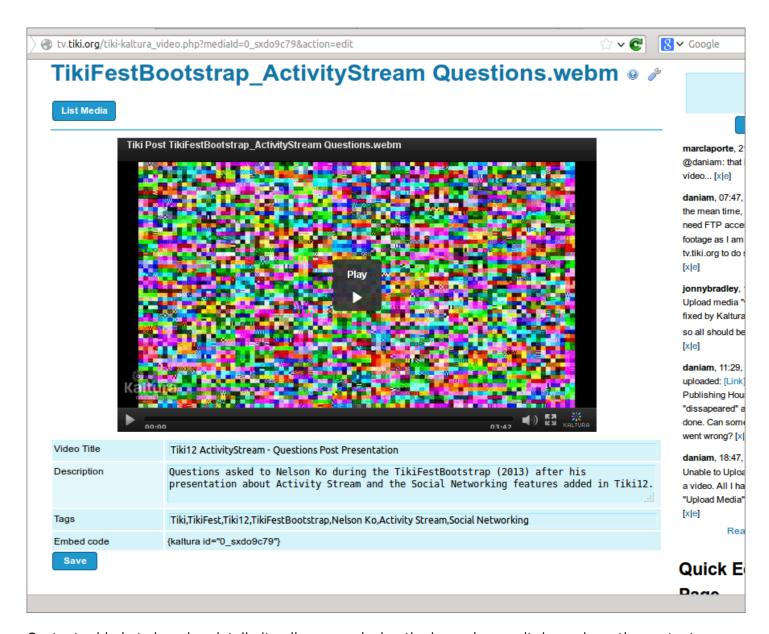

Reproduced same behavior with the other media.
