Description

This module lists users with links, but the link is missing the user ID. It goes to tiki-user_information.php?userId= instead of tiki-user_information.php?userId=1

Update: Appears that it happens when user information is private or the user preferences feature is not enabled. Looks fixed in 12.x because it doesn't show the link there but just the user name in plain text instead.

Workaround

Upgrade to 12.x
