Description

When the Draw feature is 'on' the File Gallery listing (tiki-list_file_gallery.php) shows the "Create Drawing" button after correctly checking in tiki-list_file_gallery.tpl that the the feature is 'on' and the user has upload permission for the specific gallery

However another permission check is made in tiki-edit_draw.php (line 63 onwards) but it seems to be only a global permission check so if the user has upload permission given by categorisation the button is shown but then the .php code gives an error message saying that the use does not have permission.

The permission check in tiki-edit_draw.php should therefore be extended to check for category (and perhaps object ?) permission

Solution

r49341?

Fixed - thanks
