Description

Installed and Setup Tiki 12.0 with MySQL 5.6.16.
Enabled Score feature.
Then posting to forum, I got System error. Error messages is ...

```
Tiki logs  
Field 'tstamp' doesn't have a default value - INSERT INTO...
```

I think it would be relate to MySQL version.
Is it not certified with 5.6?

I've tested it from 11.0. Score feature works well in Tiki 11.0

Park JoonHyun 11 Feb 14 05:50 GMT-0000

Finally I solved this issue. It was caused by MySQL sql_mode environment.
After disabled or null the option of sql_mode like sql_mode="", this issue does not happened more.

So close this issue, plz...
