Description

You create a blog, Assigning local perms to a group which name contains an space (or special characters such as ÃfÂ©, ÃfÂ", ÃfÂ±, ÃfÂ\$, ...). Then when you attempt to delete the local permission, you don't succeed. The url is something like:

http://domain/tiki-objectpermissions.php?referer=http%3A%2F%2Fdomain%2Ftiki-edit_blog.php%3FblogId%3D5&action=remove&objectName=BlogNAME

And it produces the error message saying something like "there is not enough information to show this page".
