## Comments

Xavier de Pedro 19 Jan 14 18:44 GMT-0000

I've checked in Tiki 12, with standard jgui theme, and no problems found. Years go up to 2015 for me. So maybe you have some old template files (tpl) in place from a former installation? Or custom tpl's that need to be updated?

Or the date in your server is wrong?

Try to reproduce in a show.t.o instance, or in demo.t.o, but I'm afraid that this issue must be specific of your installation or server.
