Description

<https://doc.tiki.org/url+Tracker+Field?structure=HomePage+Tracker>

There is no description of the options (not all of which are clear to me). Indeed, I did not realize there were options until I edited the field looking to change the display size (which is not an option). Fortunately, I then discovered display options that resolved a problem I was struggling with. I would have saved valuable time fixing my problem if I had seen the options in the documentation.

Easy to solve?

Hi hrsms:

Why don't you fix it straight away in the code or doc. site?

What do you need? Ask some help on irc (or email me?) so that you can get commit access and you learn how to fix this type of simple issues yourself (it's much faster and sustainable)

Thanks for learning whatever you are missing in order to help improve these things.

I'd be glad to, if I knew what to write. As I noted in the description, not all of the options are clearly understood to me. I could ask questions and write down the answers in the documentation but 1) that is not very efficient and 2) it introduces the possibility of me misinterpreting an answer and then misrepresenting the facts.

Hi hrsms,

I was looking into this and just wanted to ensure I properly understood what you were referring to.

When you speak of the URL Tracker options, do you mean this:

<http://www.evernote.com/shard/s76/sh/963a71a5-3f4e-4d5a-8de0-3ca0ac1b2e92/6df9e39048aa08463f0058ee60276b63>

Do you mean having an explanation for each of the options in the display dropdown?

Thanks,
Pat

hrsms 22 Jan 14 03:06 GMT-0000

Yes, that's correct.

I can guess what "URL as link" and "plain text" do. And "text as link/Other" is clear from settings window.

But I wasn't sure what "Site title as link" and "URL as link with site title" do. I doubt it is complicated, but I don't know what the site title is or where it comes from.

I think all of this, obvious or not, should be documented. I'd be glad to do it, as Xavi suggested, other than not knowing the aforementioned details.

Thanks.
