Description

RSS feed for the wiki now links to the last 10 pages changed. And no text is provided in the RSS feed. So, we click the link and we are provided with little clue of what changed. We then need to click history. Why these extra steps?

It would be much more logical to provide the diff text in the RSS feed. (instead of nothing)

Ex.:

- John has a lamb

+ Mary has a lamb

Also, the URL should link to a nice diff version instead of the page.

Ex.:

tiki-pagehistory.php?page=HomePage&compare=1&oldver=19&newver=20&diff_style=minsidediff

Therefore, we can see basic changes just with RSS and if we click we get the nice colored minsidediff

Solution

Needs some improvements, but it's done.
