I had the same problem on 18.x. Be sure to go through all of the many settings on the Admin Wiki page, cf

[https://tiki.org/forumthread73477-Backlinks-won-t-show?topics\\_offset=14](https://tiki.org/forumthread73477-Backlinks-won-t-show?topics_offset=14) Unfortunately I did not name the one that solved the problem for me, but it was definitely there.
