Description

In a Tiki 11 svn installation an upgrade notice is shown, which suggest to switch from Tiki 11.0 to Tiki 11.1 or do a major upgrade to Tiki 9.0 as follows:

Version 11.0 is no longer supported. A minor upgrade to 11.1 is required.

Version 11.1 is still supported. However, a major upgrade to 9.0 is available.

The computation and suggestion of the major upgrade version number is not correct. I'm not sure whether this problem is already fixed in a later version or not.
