Description
    if build a structure as below
    item1
    item2
    中文A
    中文B
    中文1
    中文2

    the last level won't be auto translated in random case, but if put as below, it works.
    item1
    item2
    中文B
    中文1
    中文2
    中文A

    looks the problem is due to boundary handling issue for last item in a Structure.

Workaround
    when create the structure, last item of structure should not have sub-item.
    the problem intermittently happened., after shift the item up and down, and clean the cache, it
    would looks ok.
