### Description

Tracker Date and Time field not working, nothing in the field when using Blank.

Date Tracker Fields page says for Date Time field "If the field is flagged as Mandatory, this option is ignored. If the field is flagged as not Mandatory, then the addition of an empty option will default the field to the current date or the stored date for the field.

Result: Using this field, set to blank does not produce any date.

Switching to Date and Time (Date Picker) field does not produce current date either.

Syntax at the bottom of Pretty Tracker page also does not produce a readable Created or Modified date.
