### Description

current Slideshow feature doesn't really support mobile browser, there is a workaround to set mobile browser to request desktop contents, but the navigation and screen layout not really fit to mobile nature.

slideshow is nice feature in desktop, but more people is using mobile to show the contents, to get the feature work in mobile would be helpful.

can we have a enhanced version of slideshow to support mobile?

### Solution

fixed in current Tiki versions since Tiki19 , afaik. See PluginSlideshow
