Description

I dunno when this stopped working, but it's definitively not working any more in Tiki12.

See the Featured profile: https://profiles.tiki.org/Personal_Blog_and_Profile_12x

See this:

📄
_____

objects: - type: blog ref: personal data: title: $profilerequest:Blog Title$My Personal Blog$ description: $profilerequest:Blog Description$Random daily thoughts and travel stories$ user: $profilerequest:Blog Owner$admin$ allow_comments: y

However, once the profile is applied, comments are not allowed yet on that blog.

The documentation for the blog handler says both things comments and allow_comments: https://profiles.tiki.org/Blog%20Handler

I tried both things, and none of them works for me.

Maybe some bug was introduced somewhere?

I had a look myself but unsure how to fix. (profile internals are not within my expertise)

Reproduced in the show instance:
u: admin
p: 12345

Applied the profile, and when the blog is edited, "Allow comments" is still unchecked:
