

Even the documentation page doesn't work:

<http://doc.tiki.org/PluginDraw>

b) via `tiki-list_file_gallery.php`

Click "Create Drawing" from http://doc.tiki.org/tiki-list_file_gallery.php It reports "Saved file id0" (and id0 is invalid)

When a wiki page has id=0 for this plugin, it should report an error and / or offer to create an image
