Description

Hi all

Since some recent commits related to themes and slideshow, the default slideshow behavior changed and some issues showed up with wrong font color contrast in respect to color background and side colors.

See it reproduced in this screenshot (after applying the "Slideshow_demo" profile, passing a few slides and changing the style to eggplant, for instance)

and see it also in the associated show instance.

<http://xavi-9794-5169.show.tikiwiki.org/tiki-slideshow.php?page=Tiki+Wiki+CMS+Groupware>

The first slide already have the issue of the black text shown over the dark blue color on the right.

But if you cahnge the style through the dropdown at the bottom to "eggplant" for instance, you'll get an even worse scenario: white font over white bg.

Solution

Should be fixed by 50391. Please retest.

Fixed, thanks luci!
